DERMAGEN SPRAY FOAM

## Blend of vegetable extracts and essential oils for a soothing action

DERMAGEN is a blend of essential oils and plants extracts with a soothing, healing and emollient action to be used on vaginal infections and lacerations of the mucous membranes.

DERMAGEN through the combined action of plant extracts and essential oils of proven efficacy, exerts a powerful action:

- Emollient
- Cicatrizing
- Detergent
- Protective
- Soothing
- Rebalancing of epidermal flora

Optional cannulas diam. 6mm x 60cm

DERMAGEN USE METHOD

Skake well before use.

Apply the supplied cannula or the optional cannula for 60cm treatments.

. POST PARTUM CATTLE
For an effective sanitizing and healing action.
Dispense a generous amount of product (4-6 seconds of delivery) between the vaginal lips. Repeat after a few days if necessary.

. CATTLE. RECOVERY OF THE BOVINE SPIRAL
For an effective sanitizing and cleansing action and restoring the balance of the bacterial flora.

. CATTLE. LACERATIONS AND CHAFING BETWEEN THIGH AND BREAST
Apply a generous amount of foam between thighs and breast (4-6 seconds of delivery). Keep the foam between the parts and let the absorption exert the beneficial soothing and healing effect.

. POST PARTUM CALF
Apply a small amount of foam (3-5 seconds of delivery) in the umbilical area of the calf for an effective sanitizing action.

. CATTLE. POST PARTUM METRITIS TREATMENT
When the first symptoms of metritis are detected, apply the appropriate catheter and introduce a generous amount of foam (delivery about 8-10 seconds)
Repeat the treatment after 24 hours if necessary.
As an adjuvant at the end of antibiotic douches.
This use is interesting since the foam and its components do not give residue in the milk. It is therefore suitable for use on lactating cows and to maintain effective production.

. OTHER USES
Wherever an antiseptic, sanitizing, healing and soothing action is required on wounds, mucous membranes, skin. Applicable to any animal.
